

## Play Card Punching Machine

### LUK-PCM-9000

LUK-PCM-9000 is designed for cutting play cards automatically in order.

Automatic Play Card Punching Machine LUK-PCM-9000

## FEATURES

- Sheet Material: PVC, ABS, Paper, etc.
- Sheet Thickness: 0.3-1.0mm
- Sheet Thickness: 0.3-1.0mm
- The optical sensor registration mark tracking system with  $\pm 0.1\text{mm}$  accuracy
- Low noise, low vibrations
- Shear-type male & female die sets for clean and smooth card edges
- Quick change tools
- Completed CE safety guards

## TECHNICAL DATA

Model	LUK-PCM8000
Sheet Feeding	Automatic
Card Punching	Automatic
Skeleton Collating	Automatic
Number of Punches	3 / 4 / 5 / 6 / 7
Punching Precision	$\pm 0.1\text{mm}$
Sheet Alignment & System	Optical Sensor
Quantity of Card Magazines	Customized
Punching System	PLC + Servo Motor
Approx. Output	1000 big sheets / hour
Power	380V/ 50-60Hz / 10.5kw
Gross Weight	2000kg
Machine Dimension	4000(L) x 1200(W) x 1750(H)mm

## Perfect Performance with High Quality

Perfect mechanical performance and shear-type male & female die ensures high volume production, accurate die cutting and high quality card edges.

### Play Card Samples

### Punching cards precisely

### Collecting Cards in order

### Punching die sample

## INTRODUCTION

Lukiot's fully automatic play card punching system is designed for the punching of play cards from PVC sheets or paper sheets.

The systems enable the high-quality production of play cards in order. The powerful servo motor systems ensure continuous precision with alignment to print sensor marks.

The tools are well proven with an extremely long life time. The possibility to choose 3-up / 4-up / 5-up/6-up/7-up punching layouts flexibility.
